

ITGS.

Computer Hardware in Plain English:

Mrs. Pereira at 11:27 AM, 19 Aug 2010 via web

What are the three parts common to all computers?

Mrs. Pereira at 11:27 AM, 19 Aug 2010 via web

What do the following items represent: basement, closet, and butler?

Mrs. Pereira at 11:28 AM, 19 Aug 2010 via web

What is the difference between a Hard Disk and RAM?

Mrs. Pereira at 11:28 AM, 19 Aug 2010 via web

Computer Software in Plain English:

Mrs. Pereira at 11:28 AM, 19 Aug 2010 via web

According to the video, what is software related to?

Mrs. Pereira at 11:28 AM, 19 Aug 2010 via web

What are the two basic kinds of software?

Mrs. Pereira at 11:28 AM, 19 Aug 2010 via web

Give three examples of operating systems?

Mrs. Pereira at 11:29 AM, 19 Aug 2010 via web

How does the video explain a software program?

Mrs. Pereira at 11:29 AM, 19 Aug 2010 via web

What is the difference between operating systems and software programs?

Mrs. Pereira at 11:29 AM, 19 Aug 2010 via web

basement - storage(hardrive)

GabeT. at 12:37 PM, 19 Aug 2010 via web

closet - RAM

GabeT. at 12:37 PM, 19 Aug 2010 via web

Basement - Hard drive, Closet - RAM, and Butler - Processor

GustavoB at 12:38 PM, 19 Aug 2010 via web

butler - processor

GabeT. at 12:38 PM, 19 Aug 2010 via web

Hard-drive, Random Access Memory (RAM) and the processor

Guilherme Chen at 12:38 PM, 19 Aug 2010 via web

Hard drive (basement), RAM (closet), Processor (butler).

JavierA at 12:38 PM, 19 Aug 2010 via web

Three common parts are procesor, RAM and Harddrive.The basement is the harddrive.RAM is the closet.Butler represents the Procesor.

PatrickK at 12:39 PM, 19 Aug 2010 via web

Hard drive stores all your information whereas RAM just stores information you may use temporarily, but is cleared every time you restarts.

GustavoB at 12:39 PM, 19 Aug 2010 via web

restart*

GustavoB at 12:39 PM, 19 Aug 2010 via web

Processor, RAM, Hard drive

Gina at 12:39 PM, 19 Aug 2010 via web

3 common parts - Hard drive, RAM, processor

GabeT. at 12:39 PM, 19 Aug 2010 via web

The Hard Drive, The RAM, and the Processor.

Phillipe K... at 12:39 PM, 19 Aug 2010 via web

Processor-Butler RAM- closet Hard Drive - Basement

Gina at 12:40 PM, 19 Aug 2010 via web

Harddrive stores long term memory, whereas the RAM is only for short term and empties when the computer is switched of

PatrickK at 12:40 PM, 19 Aug 2010 via web

Basement = Hard drive; Closet= Ram; Butler = Processor

Phillipe K... at 12:40 PM, 19 Aug 2010 via web

The three parts present in all computers are the Harddrive (Basement), RAM (closet) and the Processor (butler)

Pamella C. at 12:40 PM, 19 Aug 2010 via web

Basement=Hard drive, RAM=closet, Butler=Processor

AlexK at 12:40 PM, 19 Aug 2010 via web

The hard drive is where all the information is stored, RAM maintains temporaly information and the Processor is the brain of the computer.

JavierA at 12:40 PM, 19 Aug 2010 via web

Hard drive stores your information until you as the user wipe its memory and RAM only stores temporarily until its restarted.

GabeT. at 12:40 PM, 19 Aug 2010 via web

all of the information that is needed for later is sotred in the hardware, the information needed at the time is stored in the RAM

Gina at 12:40 PM, 19 Aug 2010 via web

software is compared to a translator

GabeT. at 12:41 PM, 19 Aug 2010 via web

Software is related to a translator, makes computers useful.

GustavoB at 12:41 PM, 19 Aug 2010 via web

The HArD Drive stores permanent memory and data, while the RAM memory stores temporary memory, which is easy to access.

Phillipe K... at 12:41 PM, 19 Aug 2010 via web

Software is related to a translator, which makes the computer "alive".

Guilherme Chen at 12:41 PM, 19 Aug 2010 via web

Operating system and software programs are the two basic softwares.

GustavoB at 12:41 PM, 19 Aug 2010 via web

Software can be described as a translator. It makes possible the interaction between humans and computers.

JavierA at 12:41 PM, 19 Aug 2010 via web

Softwrae is related to a translator.

PatrickK at 12:42 PM, 19 Aug 2010 via web

operating system; software programs

GabeT. at 12:42 PM, 19 Aug 2010 via web

Windows, MAC, and Linux are three types of operating systems.

GustavoB at 12:42 PM, 19 Aug 2010 via web

Two basic systems are operating systems, and software programs.

JavierA at 12:42 PM, 19 Aug 2010 via web

Windows, MAC, and Linux are 3 operating systems

GabeT. at 12:43 PM, 19 Aug 2010 via web

A software program is just a set of instructions followed by the computer that make our lives easier.

GustavoB at 12:43 PM, 19 Aug 2010 via web

operating systems and sftware programs

Guilherme Chen at 12:43 PM, 19 Aug 2010 via web

Windows, MAC and Linux are three operating systems.

JavierA at 12:43 PM, 19 Aug 2010 via web

Three operating systems are windows, mac and linux. A software program is a set of instructions.

PatrickK at 12:43 PM, 19 Aug 2010 via web

Operating systems are the programs that bring computers to life and make them useful (come installed), software programs are installed later

GustavoB at 12:44 PM, 19 Aug 2010 via web

the video talks about software programs like they were a set of instructions that the computer follows

Guilherme Chen at 12:44 PM, 19 Aug 2010 via web

Software program is a way to make the life of the user easier without computer nerds.

GabeT. at 12:44 PM, 19 Aug 2010 via web

Windows, Mac ad Linux

Guilherme Chen at 12:44 PM, 19 Aug 2010 via web

The basic systems are the operating system and the software program

AlexK at 12:44 PM, 19 Aug 2010 via web

Software is like a translator because it translates computer language into our language!

Phillipe K... at 12:45 PM, 19 Aug 2010 via web

Software are related to translator

AlexK at 12:45 PM, 19 Aug 2010 via web

Operating System and Software Programs.

Phillipe K... at 12:45 PM, 19 Aug 2010 via web

A software program will make your life easier when using a computer.

JavierA at 12:45 PM, 19 Aug 2010 via web

Two types of software are operating system and programs

PatrickK at 12:45 PM, 19 Aug 2010 via web

Operating System and Software program

Gina at 12:45 PM, 19 Aug 2010 via web

Mac, Windows and Linux

Phillipe K... at 12:45 PM, 19 Aug 2010 via web

operating system take care of basics, 3 examples (MAC, WINDOWS, AND LINUX)

AlexK at 12:46 PM, 19 Aug 2010 via web

Operating systems bring the computer to life while software programs are installed and make computers unique to different people

Guilherme Chen at 12:46 PM, 19 Aug 2010 via web

software programs are there to personalize your computer

AlexK at 12:46 PM, 19 Aug 2010 via web

Software is related to a translator, the two basic types of softwares are operating systems and software programs. Three kinds of operating

Pamella C. at 12:46 PM, 19 Aug 2010 via web

Apple, Dell and Vaio

Anton A. at 12:46 PM, 19 Aug 2010 via web

The operating system are needed to run the computer, software programs are to personalize the computer.

PatrickK at 12:46 PM, 19 Aug 2010 via web

Three examples of Operating Systems- Mac, Microsoft, and Linux

Gina at 12:47 PM, 19 Aug 2010 via web

Three kinds of operating systems are Mac, Windows and Linux

Pamella C. at 12:47 PM, 19 Aug 2010 via web

What are the three parts common to all computers? Hard Disk Ram Processor

LuisP at 12:47 PM, 19 Aug 2010 via web

Software program is more personalized and specific. You can download them from the internet or buy them.

Phillipe K... at 12:47 PM, 19 Aug 2010 via web

The operating systems are basically key for the beginning life of a computer, without it. After the operating systems had been installed, Soft

JavierA at 12:47 PM, 19 Aug 2010 via web

Basement=the bigger the hard drive the more you can store.

LuisP at 12:47 PM, 19 Aug 2010 via web

Closets = RAM makes computers faster and it is easy to access.

LuisP at 12:48 PM, 19 Aug 2010 via web

Butler = Processor, sends and receives information, completes tasks and make things work together.

LuisP at 12:48 PM, 19 Aug 2010 via web

*software systems are installed for the better use of the computer.

JavierA at 12:48 PM, 19 Aug 2010 via web

Software Program are the ones that personalize your computer and make them different from the others

Gina at 12:48 PM, 19 Aug 2010 via web

Hard Disks stores things for later access and the RAM lets you get fast and easy access to some temporary files in our computer.

LuisP at 12:48 PM, 19 Aug 2010 via web

haha

lucas at 12:48 PM, 19 Aug 2010 via web

According to the video, what is software related to? Tranlator.

LuisP at 12:48 PM, 19 Aug 2010 via web

What are the two basic kinds of software?
Photo viewer Photo editor

LuisP at 12:48 PM, 19 Aug 2010 via web

Give three examples of operating systems? Windows Mac Linux

LuisP at 12:48 PM, 19 Aug 2010 via web

How does the video explain a software program? A set of instructions that tells the computer exactly what to do.

LuisP at 12:48 PM, 19 Aug 2010 via web

Operating systems are what "brings the computer to life" while the Software programs personalize it

Gina at 12:48 PM, 19 Aug 2010 via web

The operating system is the basic , what makes the PC work, while the programs are applications that you use for specific/personal purposes

LuisP at 12:49 PM, 19 Aug 2010 via web

Difference: Harddrives have a long term memory and RAM stores short-term memory

Pamella C. at 12:49 PM, 19 Aug 2010 via web
